

src.ownedUsbDisk.Available.finishInit

src.usbDisk2.Available.finishInit

src.usbDisk2.Available.mount  
FirstFats

```
graph LR; A[src.ownedUsbDisk.Available.finishInit] --> C[src.usbDisk2.Available.mount<br/>FirstFats]; B[src.usbDisk2.Available.finishInit] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two rectangular boxes. The top box contains the text 'src.ownedUsbDisk.Available.finishInit'. The bottom box contains the text 'src.usbDisk2.Available.finishInit'. On the right, there is a larger rectangular box with a light gray background, containing the text 'src.usbDisk2.Available.mount' followed by 'FirstFats' on a new line. Two blue arrows point from the right side of the left boxes to the left side of the right box. The top arrow originates from the bottom-right corner of the top box, and the bottom arrow originates from the top-right corner of the bottom box.
